

Remaco Projector Lift PLT-420C customized series able to accommodate all types of LCD/DLP projectors. Suitable to suspend projectors with various shape and dimensions. Comes with an closure ceiling panel tray, now you can simply attach any ceiling tile to match the surrounding ceiling. It can be installed without disturbing the ceiling framework and minimum amount of ceiling space is required. It is perfect for people who required a projector lift for technical reasons, but are also design conscious. It's all about feeling comfortable with technology in your living space or work environment. It is suitable for use in conference rooms, training centers, boardrooms, showrooms and home theaters with higher ceilings.

PLT-420C Series (customized) includes:

- Ease of installation
- Infrared Remote to control projector lift up/stop/down position
- Programmable for desired height position through infrared remote
- PLT-P420C offers security as LCD/DLProjector is hidden in kept position
- Power Voltage: 230 VAC
